

Computer Science 2 Project	Team Members:	Jen Elijah R. Abasola
Group Progress Report		Blisse Allefra I. Enrique
3rd Quarter		
Week 1 - Jan 16, 2026 (covers week 1-3 of proj sched)		
GOAL State your goal for the Week	DATA COLLECTED State/list the data collected relevant to your project	PROGRESS State the progress you have made so far by the end of the week
This week, we will focus on finalizing the code's format and ensuring that its flow is well-structured, consistent, and easy to follow. This will help us create a clean, organized foundation for further development and make future updates more efficient	We will collect data from example codes available online to guide our development process. Based on this research, we will design features inspired by existing finance apps such as WalletX and Google Savings, ensuring that our application incorporates useful functionalities while aligning with our project goals and objectives.	We identified and formed clear priorities for the development of our code, discussing which features and sections required the most attention. In addition, we created a schedule with specific dates and deadlines to ensure that each task is completed in an organized and timely manner, helping us stay on track and maintain steady progress.
STRENGTH		
This week, we will focus on finalizing the code's format and ensuring that its flow is well-structured, consistent, and easy to follow. This will help us create a clean, organized foundation for further development and make future updates more efficient
